Employing Organisation:	Robinson Research Institute
Name of employer contact/manager:	Dr Fiona Stevens McFadden
Address of employer:	69 Gracefield Road Gracefield Lower Hutt 5010 New Zealand
Phone and email of employer contact/manager:	04 46 30087 fiona.stevensmcfadden@vuw.ac.nz

Brief job description (1 or 2 sentences):	Summer Engineering Intern. Worked as a part of a team in the development of an integrated GMR sensor system for use in power grid monitoring. This involved signal processing, data-analysis in Python and MatLab, embedded development as well as both digital and analog electronic work for fault simulation and monitoring. Personally my work was a mix of collaboration across different parts of the project, and working independently on the signal processing development and ML labeling, as well as preparing weekly presentations and progress summaries.
Work Experience Type (Practical or Professional)	Professional
Expected dates of employment:	Start: 11 November 2019 Finish: 21 February 2020
Expected hours per week:	40
Total hours of employment:	400
Employer Feedback: For example: How do you rate the students punctuality, technical knowledge, ability to follow instructions, ability to relate to other staff	Daniel was a great asset to the team. He acted in a professional manner at all times (working the required hours and times, participating in team meetings, respectful interactions etc). The work he did was advanced over his education level but he handled the complexity readily. He developed code that implemented the techniques we were interested in that we can now use going forward and made insightful comparisons.
Signature of student: Date: 23 / 07 / 2020	
Signature of employer contact or manager: Date: 21 / 7 / 2020
